Education

- | | |
|--|------------------------------|
| Icahn School of Medicine at Mount Sinai <ul style="list-style-type: none">• Ph.D. in Neuroscience (2016), M.D. (expected May 2018)
Dissertation Title: <i>Genetic and epigenetic risk factors of opiate abuse</i> | New York, NY
2010–present |
| Binghamton University <ul style="list-style-type: none">• B.S. in Integrative Neuroscience, B.S. in Biochemistry,
Dean's Certificate in evolutionary studies
<i>Summa cum laude</i> | Binghamton, NY
2006–10 |

Research Experience

- | | |
|---|------------------------------|
| Icahn School of Medicine at Mount Sinai <ul style="list-style-type: none">• Fishberg Department of Neuroscience, Friedman Brain Institute
Doctoral Candidate, Medical Scientist Training Program
Dissertation Advisor: Yasmin L. Hurd, Ph.D. | New York, NY
2012–present |
| Brookhaven National Laboratories <ul style="list-style-type: none">• Department of Medicine
Summer Undergraduate Researcher
Supervisor: Panayotis (Peter) K. Thanos, Ph.D. | New York, NY
2008–10 |
| Binghamton University <ul style="list-style-type: none">• Department of Biological Sciences
Undergraduate Researcher
Honor's Thesis Advisor: Anne B. Clark, Ph.D. | Binghamton, NY
2007–10 |

Grants and Fellowships

- | | |
|---|---------------------------|
| Ruth L. Kirschstein National Research Service Award Fellow <ul style="list-style-type: none">• National Institute on Drug Abuse, National Institutes of Health
Project title: <i>Identifying distinct striatonigral and striatopallidal disturbances</i> (F30-DA-038954) | 2015–present
\$171,370 |
| Barry M. Goldwater Scholar in Mathematics, Science and Engineering <ul style="list-style-type: none">• The Barry M. Goldwater Foundation | 2009–10
\$7,500 |

Presentations

Talks

- Miller ML**. Transcriptional microdissection of striatal neurocircuits: applications for studying substance use disorder. Undergraduate Research Symposium in Biological, Chemical, Structural, and Computational Sciences, Icahn School of Medicine at Mount Sinai, New York, NY, 17 September 2016.

Posters

- Miller ML**, Ye F, Tome-Garcia J, Zhang DY, & Tsankova NM. Assessment of focal gene amplifications and EGFRvIII mutation in glioblastoma through next-generation sequencing. 93rd Annual Meeting of the American Association of Neuropathologists, Hyatt Regency Orange County, Garden Grove, CA, 8–11 June 2017.
- Miller ML**, Ren Y, Szutorisz H, Egervári G, Morris CV, Sperry J, & Hurd YL. Striatal *CREM* mediates impulsive action and associates with fatal overdose in heroin abusers. 7th Annual Neuroscience Retreat at the Icahn School of Medicine at Mount Sinai, The New York Academy of Medicine, New York, NY, 13 May 2015.
- Miller ML**, Chadwick B, & Hurd YL. Identifying distinct striatonigral and striatopallidal disturbances after developmental cannabis exposure: pathway-specific changes in miRNAs and their contribution to heroin addiction. 6th Biennial Gordon Research Conference on Cannabinoid Function in the CNS, Renaissance Tuscany Il Ciocco, Barga LU, Italy, 24–29 May 2015.
- Miller ML** & Hurd YL. Identifying distinct striatonigral and striatopallidal disturbances after developmental cannabis exposure: pathway-specific changes in miRNAs and their contribution to heroin addiction. 14th Annual Medical-Scientist Training Program Retreat at the Icahn School of Medicine at Mount Sinai, Honors Haven Resort, Ellenville, NY, 5–7 September 2014.
- Miller ML** & Hurd YL. The impact of adolescent THC on mesolimbic microRNA regulation. 5th Biennial Gordon Research Conference on Cannabinoid Function in the CNS, Waterville Valley, NH, 4–9 August 2013.

Mentorship and Teaching

- **Teaching Assistant for Brain & Behavior**
Fall 2012 through Fall 2015, Directed by Carrie Ernst, M.D.
- **Teaching Assistant for Principles of Neurobiology: Systems Neuroscience**
Winter 2013, Directed by Elizabeth Cropper, Ph.D.
- **Teaching Assistant for General Pathology**
Winter 2012, Directed by Margret S. Magid, M.D.
- **Undergraduate Teaching Assistant for Cellular Neurobiology**
Fall 2008 and Fall 2009, Directed by Carol I. Miles, Ph.D.
- **Mentored summer undergraduate interns and Master's students**
J Rodriguez (2013), N Downer (2014), Y Valentine (2015) and T Rahman (2015–2016).
Directed by Yasmin L. Hurd, Ph.D.

Awards

- Icahn School of Medicine Medical Student Travel Award (Spring 2017), \$500
- Icahn School of Medicine Graduate Student Travel Award (Spring 2015, Spring 2017), \$400 each
- Society for Neuroscience Graduate Student Travel Award (2013)
- Gordon Research Conference (GRC) Graduate Student Poster Award (2013)
- President's Award for Undergraduate Student Excellence (2010), \$1000
- State University of New York Chancellor's Award (2010)
- John L. Fuller Memorial Award (2010), \$100
- Binghamton University Undergraduate Research Award (2008, 2009), \$169 & \$250
- Edward Thorsen Memorial Scholarship (2008), \$400
- Freshman Chemistry Award (Fall 2006, Spring 2007), \$50 each
- Brain Awareness Week Travel Award (2009), \$750 + conference registration
- Sigma Xi Undergraduate Research Poster Award (2008, 2009), \$100 each
- U.S. Department of Energy Summer Undergraduate Lab Internship (Summer 2009), \$3200 stipend

- Plainview Diner Scholarship (2006), \$500

Professional Mission

(Statement prepared for Washington University in St. Louis)

My goal is to practice clinical neuropathology and develop an NIH-funded research program to study the molecular mechanisms of neuropsychiatric illness. I am specifically interested in identifying the contribution of discrete neurocircuits to different aspects of behavior, cognition, and disease. Stemming from my doctoral research for instance, I am interested in understanding the distinct roles of two complementary striatal pathways—the striatonigral and striatopallidal pathways—and their contribution to psychosis and affective disorders. Ultimately, I am interested in using single-cell sequencing and neuroanatomical tracing studies for unbiased, high-throughput characterization of neurocircuits. I then want to use post mortem human tissue to investigate the clinical significance of the targets identified from these animal studies. My clinical training in neuropathology will not only maintain my direct involvement in patient-care, something that I am eager to accomplish, but it will also keep my studies clinically informed and translational.
